Task:

List down key points of your (individual) contribution towards your group project.

Name of Project: *Robot Motion Using Voice*

My Contribution

- Creating the Android Application using MIT APP Inventor
- Formulating a method to visualize the data
- Helping in making the PowerPoint Presentation

Future Scope of my group project

- Our project with certain modifications has the potential to move and carry hazardous substances without anyone having to be physically present at the location.
- Our project can be modified for carrying heavier cargo by just connecting more powerful motors and connecting them to relay without modifying the basic circuitry of the project.
